

## EZO Miniature ball bearing stainless steel open

Miniature ball bearings are single-row deep groove ball bearings with a bore diameter of up to 10 mm. Single-row deep groove ball bearings are extremely versatile. They are simple in design, suitable for high to very high speeds, very robust and thus low-maintenance. Thanks to the deep grooves and the close contact between the grooves and the balls, deep groove ball bearings can tolerate both radial loads and axial loads in both directions, even at high speeds. Precision miniature ball bearings are particularly suitable for small electric motors and gearboxes, office machinery, medical equipment, mechatronic applications etc. Both open (unsealed) and sealed versions of the miniature ball bearings are available. All bearings are also available in stainless steel [supplement VA]. The load rating of a VA bearing is approximately 15% lower than that of the equivalent bearing made from chrome steel.

### Characteristics

**Series:** MR

**Type:** 688

**Execution:** Single row

**Material:** Stainless steel

**Sealing:** Open

**With flange:** No

### Application

- Recommended in: Food & Beverages

Manufacturer ID	Inner diameter mm	Outer diameter mm	Width mm	Internal clearance	Cage	Article
681 VA	1	3	1	CN [normal]	Stainless steel	13550081
