

Ring gauge type 4405

DIN 2299	DIN ISO 1502	DIN 13	M
-------------	--------------------	-----------	---

Design: Made of high-quality special gauge steel, completely hardened, unstressed and precision ground, tolerance class 6g. For metric ISO regular threads DIN 13.

Application: For testing threads.

Note: In order to prevent premature breaking away of the thread gear, the first thread gear is ground and removes coarse dirt. Intermediate dimensions and other tolerances available on request.

Design: Made of high-quality special gauge steel, completely hardened, unclamped and precision ground. Tolerance class 6g.

Application: For inspecting threads. Thread go plug gauges or ring gauges must be easy to screw onto the test object. Thread no-go plug gauges or ring gauges have few shortened thread turns, and are used to inspect the flank Ø. It should not be possible to screw them onto the test object.

Note: Intermediate dimensions and other tolerances available on request.
