

OSBORN Pin brush silicone carbide type 7135

Design: Very robust, nylon filaments impregnated with silicon carbide with hard and pointed tips and very flexible working surface. No risk of due to despite high elasticity and flexibility. This prevents clogging the trim with grinding residue to ensure constant high quality grinding. Plus the abrasive filaments are resistant against weak acids and lyes.

Application: For deburring precision parts with unvarying grinding performance. With the new silicon carbide abrasive filaments, non-ferrous metals as well as stainless steel can be processed. Suitable for wet and dry processing.

Note: Observe safety recommendations.
