

TIMKEN Wide inner ring insert bearing Cylindrical Outer Ring Eccentric Locking Collar Series: G..KRR

- Wide inner-ring ball bearing. Industrial series G-KRRB
Relubricatable types. The G-KRR-series wide-inner-ring ball bearings are the same as the RR series and have a provision for relubrication.
- These bearings are designed for extremely dirty or wet conditions.
- The bearing includes R-seals with flared lips that firmly contact the ground O.D. of the inner ring. The inner ring provides a positive seal against dust, dirt and other contaminants, and effectively retains the lubricant.
- G-KRR-series bearings are equipped with shroud-seals, providing extra effectiveness and protection.
- The extra-wide design provides additional shaft support and extra-large grease capacity.

Characteristics

Series: G..KRR

Model: Cylindrical Outer Ring

Shaft Locking Type: Eccentric Locking Collar

With sealing: Yes
