

PFERD Flap disc, PFF/PFC, ceramic grain CO-COOL

Design: With ceramic grain layers (CO) and coolant. Tough design, resin-bonded, high strength with fibreglass discs attached. Not made with iron, sulphur or chlorine additives. Standard bore 22.23 mm.

Application: Special product for high-alloy and rust-proof steel, nickel-based alloys, titanium alloys, aluminium and non-ferrous metals. With especially cool cut due to the ceramic grain layers. Even with minimal pressure on adjustable angle grinders a cooler cut is achieved. So particularly suited for work on sheet metal and thin-walled sections.
