

## PFERD POLIFAN laminated sanding disc, zirconium corundum STRONG type 8314

**Design:** With zirconia alumina layers (Z), consistent tough design, resin-bonded, high strength with fibreglass discs attached. This gives maximum residue removal rate and extremely long life. Not made with iron, sulphur or chlorine additives. Standard bore 22.23 mm.

**Application:** Special product for steel work.

Grain size 36 is optimum for coarse steel work, for example weld seam processing. Grain size 50 is optimum for edging work, for example chamfering, deburring. The high performance zirconia alumina cutting surface has the best impact on high-powered angle grinders.
