

PFERD Laminated Sanding Disc Ceramic grain CO

Design: With ceramic grit [CO] for an ultra-cool grind on poor heat conducting materials, in resin bonded, high-strength attached to a glass woven base. Therefore, highest material removal with exceptional life span. Not made with iron, sulphur or chlorine additives. Standard bore 22.23 mm.

Application: Ideal for processing stainless steel and poor heat conducting materials. Due to the special radial construction the flap grinding disc is suited to working on fillet seams as well as chamfering and deburring.
