

## ANSELL Glove NeoTouch® 25201 bright green

A unique combination of allergy prevention and comfort.

### Description

- The NeoTouch gloves were the first neoprene single-use gloves for industrial usage.
- With a latex-free formulation, NeoTouch gloves are appropriate for the prevention of Type I allergies. Because they're powder-free, they also limit the risk of dermatitis for the wearer.
- They provide excellent resistance to acids, bases and alcohols. Thanks to an exclusive formulation, NeoTouch gloves are convincingly the most comfortable synthetic single-use gloves available today.
- NeoTouch gloves have a polyurethane inner-coating that ensures easy donning. Their textured fingertips provide a secure grip in both dry and wet conditions. The beaded cuff ensures a secure hold, and their green colour makes them easy to identify.
- NeoTouch gloves are inspected to an AQL of 1.5 for pinholes, which matches the legal requirements for medical gloves.

### Remarks

- 25-101: Fit for special purpose

### Primary Industries

- Agriculture & Viticulture
- Chemical Pharmaceuticals

### Ideal Applications
