

SHOWA Gloves 660 30 cm

Waterproof, supple and comfortable gloves, manufactured using a patented process that involves dipping a fine knit. Their performance and longevity are improved by a special hydrocarbon treatment. The cotton liner is both soft and comfortable. PVC, the material that is known to offer the greatest resistance to oils and chemicals (hydrochloric acid, caustic soda and kerosene in particular), does not cause allergies. It provides maximum resistance to abrasion (level 4), which is reinforced by a rough finish on the hand that allows objects to be gripped securely.

Characteristics

Series: 660

Colour: Blue

Application

Application area

- Chemical crop protection, application of coatings, painting and spraying workshops, mining, drilling rigs, auxiliary equipment for drilling rigs, working in the mine, grinding, material handling.
