

KUKKO Separating puller type 6911

Design: Has lateral pressure piece and puller legs made of chrome alloy tool steel with conical cutting on one side and normal cutting on the other side. Has freely rotating centring tip and tempered, specially coated pressure spindle with particularly good sliding properties.

Application: Suitable for use in hard to reach places due to the space-saving form. Due to conical cutting, this puller is suitable for removing flush-fitting axle bearings, ball bearing rings, pinions etc.
