

## OSBORN Honing brush type 7035

Design: Robust, self-centring honing tool with silicon carbide fill for a gentle grinding process. The abrasive spheres adapt to the surface with the flexible brush construction. Overall length 200 mm.

Application: For final finishing of surfaces and bores. Can also be used for edge breaks and processing of unrounded holes. For the generation of fine-ground surfaces with a high contact ratio for any potential oil-film adhesion. Easy handling on hand drills, honing machines and automatic machines.
