

PFERD Handy file set type 2627

Contents: Five handy files of the following profiles: Hand [2601] Three square [2607] Square [2408] Round [2610] Half-round [2602]

Available in two different cuts.

- Contain an application-oriented selection of handy files for work in the narrowest and most hard-to-reach places.

These products are supplied in a plastic pouch for optimum protection against mechanical damage, dirt and corrosion.

- PFERD precision files meet the most exacting standards of dimensional accuracy, cutting performance and longevity.

Compared to machinist's files, precision files are smaller, easier to handle, and possess a more precise geometry.

They are used in the jig and tool construction fields, in particular to produce tools for punching, shaping, forging and stamping serial articles etc.

In addition, precision files are suitable for assembling tasks and building complex devices and machines to the highest precision standards.

The cross section is measured at the uncut part of the file.

Model	Length mm	Article
Cut 1	215	23870874
Cut 00	215	23870873
