

BESSEY All steel bench fitter clamp SGM

Design: Fixed bracket and pressure plate manufactured from one piece of Special steel; warp-resistant. Newly designed, U-shaped mobile bracket made of forged heat-treatable steel. Greatest security thanks to linear force transmission at the new mobile bracket. Heat-resistant, high-performance pressure plate with large ball coupling, can be pivoted 35° and replaced, with hardened and oil-soaked sintered steel insert. 20% more clamping force per spindle rotation due to optimised rail profile.

Application: Especially for clamping forces up to 12 kN. As such, it can be used for all metal processing and in steel construction, as well as in woodworking.
