

SKF Aluminium heating rings series TMBR

- The aluminium heating rings are designed for dismantling inner rings of cylindrical roller bearings. They are available for all bearing sizes of the NU, NJ and NUP series, these are bearings without flanges or with only one flange on the inner ring. Simple and easy-to-use
- Avoids shaft and bearing inner ring damage

Characteristics

Series: TMBR

Technical Information

- Material: aluminium
- Maximum temperature: 300 °C (572 °F)
