PRESSOL Grease filling device

Grease filler valve

Design:
Due to the high sliding cover, the amount of grease which is still in the bucket can always be checked. The filling nozzle is placed obliquely, so that grease guns with obliquely inserted filler nipple can be filled easily. The large handle allows for easy removal of the grease sequence piston. Supplied with intake pipe, filler nipple M10 x 1 and dust cap on the filling nozzle secured with a chain for converting to grease guns of other makes.

Application:
For filling grease guns and pneumatic presses.

Characteristics

Type: 17 815
