

HEICO-LOCK Wedge lock washer steel Delta Protekt

The HEICO-LOCK wedge locking system delivers high quality anti-vibration security for the most demanding of bolted joint applications.

Even under extremes of vibration or dynamic loads, HEICO-LOCK wedge lock washers provide maximum reliability.

When the bolt is tightened, the external radial teeth of the HEICO-LOCK wedge lock washers embed themselves in an interlocking fashion with the respective mating surface.

If the securing system is subject to dynamic stress, movement is only possible between the internal washer surfaces.

This results in an increase in the preload force.

Characteristics

Surface protection: Delta Protekt®

Material	Inner diameter mm	Outer diameter mm	Suitable for bolt size metric [M..]	Suitable for bolt in imperial size	Article
Carbon steel	5.4	9	5	#10	12984996
Carbon steel	6.5	10.8	6		12984999
