

ERIKS Self-adhesive rubber strips

The self-adhesive rubber tapes from ERIKS are used for all kinds of different purposes. They are suitable as a draught strip under your door, but also often a good solution in technical applications (as a rubber seal, for example). All the rubber tapes are made of cellular rubber, also called foam rubber. You buy the product on a roll and simply cut off what you need each time. The rubber self-adhesive tape products are available in EPDM and CR (neoprene). The thicknesses of the standard types vary. The tapes are always rectangular in shape. What if you need a different shape? Then choose one of our other (self-adhesive) rubber profiles.
