

KTR Universal single joint with plain bearing

The precision joints consist of a joint center piece and two hub bodies connected through some tabs. A plain bearing, type G, or a needle bearing, type H, make sure for the bearing of the joint heads. Openings are provided for lubrication of the plain bearings. The precision joints with needle bearing are designed with a permanent lubrication and are thus maintenance-free. Both options offer a high efficiency level as well as smooth running with low friction.

Type	Size	Version	Material	Bore mm	Article
Universal joint	1	Slide bearing	Steel	16	23560016
Universal joint	04	Slide bearing	Steel	12	23560006
Universal joint	5	Slide bearing	Steel	25	23560033
