

## SKF Sliding strip Sheet steel/PTFE composite Maintenance-free Series: PCMS

- PTFE composite strips are suitable for space-saving arrangements of all types. These strips can easily be fit to the application and counterface.

Advantages of these strips include:

- maintenance-free operation
  - very good frictional properties
  - high load carrying capacity
  - high operating temperatures
  - high sliding velocity
- PTFE composite strips are suitable for applications where a sliding material with self lubricating properties is a prerequisite.
- Application area examples for these strips are:
- automotive
  - material handling equipment
  - home appliances and consumer goods
  - textile machinery

### Characteristics

**Series:** PCMS

**Maintenance:** Maintenance-free

**Material outer sheath:** Sheet steel

**Tread material:** PTFE composite
