

EWELLIX Shaft support with mounting holes series LRCB

LRCB/LRCC shaft supports to fit open type linear ball bearing units (ISO series 3). For heavily loaded linear bearing units and/or long track lengths, we recommend the use of shaft supports to eliminate shaft bending. For these applications, continuous or at least partial support of the shaft is necessary. LRCB/LRCC offers shaft supports for shaft diameters ranging from 12 to 80 mm. There are two types of shaft support: the LRCB with predrilled holes and the LRCC without holes. Note: Shaft supports require the use of open design linear bearing units. To be mounted at the shaft for unlimited axial stroke. Supplied with mounting holes in 600 mm standard length.

Characteristics

Series: LRCB

With drilled holes: Yes

Material: Aluminium
