

DEB STOKO Skin protection for specialist application Travabon® Classic

Fat-free skin protection against oily and water-insoluble workplace substances. Make it easier to clean your skin after contact with heavy-duty contamination. Travabon® Classic contain a high proportion of the inorganic solid talc, which forms a physical protective layer on the skin. This protective action has a particularly positive effect where skin comes into contact with organic solvents or substances containing solvents, as well as when working with metal-working oils and glass fibre. Travabon® Classic contain special emulsifiers featuring very good skin compatibility. These emulsifiers act to reduce the ability of water-insoluble substances to cling to the skin, making it easier to clean skin that has been exposed to heavy-duty or very stubborn contamination. Used frequently, the protectant can substantially reduce the amount of strong hand cleansers often needed to remove stubborn ingrained dirt.

Characteristics

Series: Travabon® Classic

Application

- To protect the skin on hands and arms where there is contact with oily, water-insoluble substances and waterimmiscible metal-working oils. To make skin cleansing easier after working with heavyduty or very stubborn, water-insoluble contamination caused by oil, paint, lacquer, graphite, metallic dust, adhesives and resins, and also after working with dry dust. Travabon® Classic is not designed for use under gloves.

Technical Information

- White-greyish, slightly perfumed, silicone-free, non-oily ointment with high pigment content [suspension].

Operating Principle

- Wash and dry the skin thoroughly before each application. Then carefully rub Travabon® Classic on to the areas of skin at risk, including between the fingers and on the fingernails. Travabon® Classic should always be used before starting work, after washing hands and after any lengthy breaks. To achieve the best results, the dirt should first of all be loosened using just a little water prior to actual cleaning, the skin should then be thoroughly rinsed under running water. Travabon® Classic must be applied again after heavy sweating or contact with water. NB: Using skin care products does not release you from your duty to take the prescribed protective measures.
