

SKF Hydraulic nut metric thread Series: HMV..E

- Mounting bearings on tapered seatings can be a difficult and time-consuming job. Using an SKF Hydraulic Nut facilitates easy and quick application of the high drive-up forces required for mounting bearings on tapered seatings. Dismounting bearings mounted on either adapter or withdrawal sleeves can also be simplified by using an SKF Hydraulic Nut. Quick connection coupling can be fitted on the face or side of the nut, allowing the nut to be used in areas where space is limited.
- A spare set of piston seals and maintenance kit is supplied as standard.
- Nut supplied with a quick connection coupling to fit the SKF hydraulic pumps.
- Nut equipped with two tommy bars and four mating holes on their front face to facilitate easy nut threading.
- Nut equipped with eyebolts, allowing easy handling.
- Nut equipped with two tommy bars and four mating holes on their front face to facilitate easy nut threading.
- Nut has the starting position of the thread indicated, facilitating easy matching of thread positions on both the nut and mating thread.

Characteristics
