

ECON® Y-filter Type: 1020 Ductile cast iron Flange

Characteristics

Type: 1020

Application

- Gases, steam, water, oil and other process fluids
- Perforation of 0.25mm suitable for steam applications

Technical Information

- Horizontal piping
- Vertical piping with downwards flow
- Max. differential pressure 1bar
- Suitable for suction and delivery piping
- With drain plug as standard
- Pressure class for DN 15 to DN 200 in PN 25, for DN 250 and greater in PN 16
- Max. differential pressure 1bar
- All measuring connectors have two 0.25-inch BSP female threads.
- Various types of measuring nipples are available that can be connected to IMI (TA) or Oventrop measuring computers.
- At the measuring connectors, the differential pressure (and therefore also the contamination) can be measured directly at the filter using a coated differential pressure gauge (type 755), in combination with a reed switch if necessary.

Options

- Available with other perforations from 0.25mm to 3.0mm
- Available with magnet
- Available with material certificate EN 10204 3.1
