

SKF Double row deep groove ball bearing Steel Open

Double row deep groove ball bearings correspond in design to single row deep groove ball bearings. Their deep, uninterrupted raceway grooves have a close osculation with the balls, enabling the bearings to accommodate radial loads and axial loads in both directions. Double row deep groove ball bearings are very suitable for bearing arrangements where the load carrying capacity of a single row bearing is inadequate. For the same bore and outside diameter, double row bearings are slightly wider than single row bearings in the 62 and 63 series, but have a considerably higher load carrying capacity. Double row deep groove ball bearings are only available as open bearings (without seals or shields).

Characteristics

Series: 4200

Type: 4302

Execution: Double row

Material: Steel

Sealing: Open

Manufacturer ID	Inner diameter mm	Outer diameter mm	Width mm	Internal clearance	Cage	Article
4200 ATN9	10	30	14	CN (normal)	Plastic	4200-SKF
4201 ATN9	12	32	14	CN (normal)	Plastic	4201-SKF
4202 ATN9	15	35	14	CN (normal)	Plastic	4202-SKF
4203 ATN9	17	40	16	CN (normal)	Plastic	4203-SKF
4204 ATN9	20	47	18	CN (normal)	Plastic	4204-SKF
