

## WEARWELL NEW 24/Seven Locksafe

You invest a lot of time and money in your matting program. There is a ton of effort that goes into making the right decision, getting the approvals, scheduling the install and getting those mats in place. Choose 24/SEVEN® LockSafe® with a patent pending Positive Interlock System, so you can “lockdown” the mats securely and they stay together. Positive systems lock in: Both male and female connectors have a flange that lock together and provide a secure connection in all directions. Why it matters: They don’t come apart until you want them to! Lift up, roll up and roll away for removal or maintenance.

- Available in 2 different rubber compounds based on environmental exposures:
  - GR- Water or dry debris
  - NBR- Petroleum-based fluids
- Hidden interlocks
- Choice of solid or drainage styles
- Choose GRITSHIELD for increased traction
- Custom widths or unique configurations are available in 30 cm (12") increments
- Overall thickness 16 mm (5/8")
