

ALFA LAVAL Manhole Cover LKDC Stainless Steel 316L

Application

The circular LKDC and LKDS stainless steel manhole cover is used on tanks or containers where a closeable mean of access to the interior of the vessel, situated above the liquid level, is required.

Working principle

The LKDC cover is supplied with a replaceable, self-sealing double lip seal (see fig. 2.) to prevent fluids from spraying out, e.g. during CIP cleaning and similar processes or during travel on mobile tanks or road tankers.

The LKDS cover is not designed to fit watertight to the tank and therefore it is supplied with a splash guard to prevent liquid spraying out during a cleaning process.
