

WERA Hexagon key, long, stainless steel type 5872

RVS

Design: Made of stainless steel, hard and tough (54 HRC) thanks to vacuum ice-hardening. With Hex-Plus geometry. This reduces the notch effect and the destruction of the screw head, at the same time 20% more static torque. The ball head allows for screwing in inclined positions.

Application: Special product for avoiding extraneous rust when working with stainless steel screws.
