

HONEYWELL Face shield Supervisor

A robust, hard-wearing face shield with many attachment options. The seamed visor reduces gaps - the profile of the visor follows the contours of the face to allow maximum protection and unrestricted head movement. The special design allows the visor to be placed at an angle. This allows ear muffs to remain on the ears. The attenuation performance of the hearing protector remains unaffected and the largest possible area of the face remains covered.

Product features

Compatible with a wide range of helmet types (size, shape and geometry)
Secure visor attachment
Full face protection: variants with chin guard are available for additional protection
