

FORMAT Torque wrench type 6238

Design: Maximum precision even at extreme continuous use. Adjustable torque wrench with square drive and integrated ratchet function for controlled clockwise and counterclockwise tightening. Sturdy tubular steel construction with galvanised ratchet. Articulated mechanism with a slide roller guarantees acoustic and tactile trigger signal.

Delivery includes test certificate according to DIN EN ISO 6789.

Application: For controlled screw tightening in the corresponding torque range for all industrial manufacturing areas.

Supplied in a plastic box.
