

SKF Combined Needle roller/Angular contact ball bearing with inner ring Double direction Series: NKIB

Combined needle roller bearings comprise a radial needle roller bearing, which is combined with an axial bearing component. These bearings can support radial as well as axial loads with just one bearing and permit locating bearing arrangements with only a small radial design envelope section. They are suitable, for example, where radial and axial loads are present and simple axial contact washers are no longer able to support the axial loads on account of their size, high speeds or inadequate lubrication, and other locating bearings require too much installation space.

Characteristics

- Series:** NKIB
- Variant:** Double direction
- Model:** with inner ring
- With cover:** No

Manufacturer ID	Inner diameter mm	Outer diameter mm	Width mm	Article
NKIB 5904	20	37	25	NKIB5904-SKF
NKIB 5907	35	55	30	NKIB5907-SKF
NKIB 5913	65	90	38	NKIB5913-SKF
