

FAG Single row tapered roller bearing Metric

Tapered roller bearings have tapered inner and outer ring raceways and tapered rollers. They are designed to accommodate combined loads, i.e. simultaneously acting radial and axial loads. The projection lines of the raceways meet at a common point on the bearing axis to provide true rolling and low friction. Single row tapered roller bearings are separable, i.e. the inner ring with roller and cage assembly (cone) can be mounted separately from the outer ring (cup).

Characteristics

Series: 302

Manufacturer ID	Inner diameter	Cup Outer diameter	Total width	Article
	mm	mm	mm	
33010	50	80	24	33010-FAG
