

## **EZO Single row deep groove ball bearing Stainless steel Open**

Stainless steel deep groove ball bearings are corrosion resistant when exposed to moisture and several other media. These deep groove ball bearings are particularly versatile. They are simple in design, non-separable, suitable for high and very high speeds and are robust in operation, requiring little maintenance. Single row deep groove ball bearings have deep, uninterrupted raceway grooves. These raceway grooves have a close osculation with the balls, enabling the bearings to accommodate radial loads and axial loads in both directions. They can accommodate radial loads and axial loads in both directions. The stainless steel bearings have a lower load carrying capacity than same-sized bearings made of high chromium steel. Stainless steel deep groove ball bearings are available open or capped (with seals or shields).

## **Characteristics**

Series: 60 **Type:** 6004

**Execution:** Single row Material: Stainless steel

Sealing: Open

## **Application**

• Recommended in: Food & Beverages

Manufacturer ID	Inner diameter	Outer diameter	Width	Internal clearance	Cage	Article
	mm	mm	mm			
6000 VA	10	26	8	CN (normal)	Stainless steel	23198529
6011 VA	55	90	18	CN (normal)	Stainless steel	13000342
6012 VA	60	95	18	CN (normal)	Stainless steel	13000344
