

SMC Filter Regulator & Filter Regulator with Backflow Function series AW20(*)-B to AW60(*)-B

This combination Filter/ Regulator minimizes space and piping by integrating the 2 units into one. Standard features include a relieving regulator, which can be quickly locked by pushing down on the adjustment knob. There are many options, which include gauges, auto-drain, metal bowl and covers, different set pressures, etc. The AW-B is part of the family of modular air preparation units and can be combined with other similar sized products. This series is available in 3 body sizes with piping from 1/8 to 3/4 in Rc, NPT or G thread types. Integrated filter and regulator units save space and require less piping. With the backflow function it incorporates a mechanism to exhaust the air pressure in the outlet side reliably and quickly.

Characteristics

Series: AW-B

Function: Filter-Regulator

Bowl Material: Polycarbonate

Lockable: No

Operating temperature: -5 / 60 °C
