

ADCA Ball float steam trap Type: 2932E Series: FLT ductile cast iron maximum pressure difference 10 bar flange

ADCA float steam traps are universally applicable in all steam systems. The float mechanism guarantees a direct discharge of condensate at steam temperature. There is no stalling or subcooling in front of the steam trap, enabling a maximum heat transfer to take place in your heat exchanger. Due to the integrated bi-metal vent, the ADCA float steam traps will quickly discharge the air and other non-condensable gases during the start-up, which significantly reduces the start-up time. Due to the modulating action of the float, the ADCA float steam traps are insensitive to sudden changes in capacity or pressure. Another considerable advantage is that you can adjust the flow direction yourself; both from left to right and vice versa, as to vertical.

Characteristics

Series: FLT

Type: 2932E

Connection: Flange

Standard connection: EN 1092-1/02

Maximum pressure difference: 10 bar

PMA - maximum allowable pressure: 16 bar

TMA - maximum allowable temperature: 250 °C

PMO - maximum operating pressure: 14 bar

TMO - maximum operating temperature: 250 °C

Housing material: Ductile cast iron

Material bonnet: Ductile cast iron

Seat material: Stainless steel 303 (1.4305)

With automatic de-aerator: Yes

With built-in filter: No

Approvals: PED 2014/68/EU fluid group 2

Application

- Universally applicable for directly discharging of large quantities of condensate in among others: Heat exchangers.
- Air heaters.
- Counter current devices.

Technical Information

- CE-markering - Groep 2 (PED - European Directive): Uitvoering DN15, tot en met DN50 normale capaciteit: Categorie SEP.
- Uitvoering DN50 hoge capaciteit: 1 [CE gemarkeerd].

Options

- Steam Lock Release [SLR].
- Vent valve [HVV].
- Drain valve [BDV].
- Anti Freezing Unit [AFZ].
- Float lever [FLL].
- Vacuum breaker [VB21M].

Size table:

DN	Capacity	A mm	B mm	D mm	C mm	E mm	Weight kg/s
DN15	SC	150	160	139	60	79	6.2
