

TRACTEL Harness HT56 A Quick-release buckle

Harness with 2 chest anchorage points for industrial maintenance

The HT 56 A is a versatile harness with three anchor points: 1 anchor point on the back, 1 central anchor point on the chest, 2 lateral anchor points on the chest.

It is particularly suitable for industrial maintenance thanks to the 2 lateral anchor points on the chest which can, if necessary, be used as work position anchor points with the use of a suitable lanyard.

It is a perfect harness for construction workers (ladders, scaffolding, roofs, etc.) thanks to the chest anchor points.

The comfortable harness.

The use of elastrac™ straps, available as an option, provides the right level of comfort for prolonged use. The harness is very easy to put on because it opens completely at the front and the X-Pad keeps the shape of the harness. Donning the harness is further facilitated by the use of the automatic buckles available as an option.

Features HT56 harness:

Complies with the EN 361 standard

1 back point with a large D-ring to eliminate the risk of detachment from the carabiner

1 central attachment point on the chest

2 lateral attachment points on the chest

5 adjustment points

With comfortable X-Pad back support

Fall indicators on each attachment point

Quick release buckles

Label holder

Pelvic belt

Very comfortable horizontal leg straps
