

E-COLL Pneumatic caulking gun for cartridges and tubular bags

Compressed air gun for cartridges and sleeve pouches.

- **Product description**

Professional compression gun for use with different sealants and adhesives. The press has a pliable piston which is stuck to the inside of the aluminium tube. This gives a clean and optimised expulsion from pouches. Made from anodised aluminium so extremely durable. Due to the optimised positioning of the grip in the middle of the tube and its lightness this is easy to operate. With the pressure reducer the speed of expulsion can be continuously adjusted. A special screw on the front guarantees a quick change of pouches and cartridges. Releasing the trigger instantly releases the pressure and prevents the sealant leaking out. Optimised centre of gravity, minimal air usage.
