

3M Fibre abrasive disc for steel machining, Cubitron II 982C 115mm

Design: Fully resin-bonded precision grit (Cubitron? II) on vulcanised fibre backing material, scattered evenly and semi-loose. The individual grains of the ceramic Cubitron? II abrasives are small, precisely-shaped triangles, perpendicular in arrangement, and uniform in size. They are uniformly distributed but randomly spread, so that each triangle grain can form two chips. Tough, cool grinding with high removal rate, lasts up to 3 times longer and over 30 % faster removal.

Application: In all metal-working areas where there are frequent casting and flame cutting processes on construction steel and non-ferrous metals.

Note: For backing discs with grain sizes 36+ and 60+ see [Order No. 8239], for grain size 80+ see [Order No. 8240).

Characteristics

Series: Cubitron **Type:** 982C

Description	Article
Fibre grinding wheel Cubitron II 982C 115mm P036+	12532811
Fibre grinding wheel Cubitron II 982C 115mm P060+	12532812
Fibre grinding wheel Cubitron II 982C 115mm P080+	12158034
