

KLINGSPOR Grinding head type 8438

Design: With aluminium oxide layers [A] in resin bond. With M14 connection thread. The fan-shaped radial layout is outstanding and particularly adapted to the contours of the workpiece.

Application: For working with steel, stainless steel, colours, synthetics and wood with angle grinders. Especially for deburring, whereby edges can be rounded. No secondary burr is formed. Also outstanding for deburring surface laminates. As a rule, second sanding is omitted prior to re-coating.

Ø 125 mm
