

KUKKO Hydraulic nut splitter

hydraulic

Design: Made of tempered special steel, with hexagonal nut to tighten the hardened chisel cutter as well as anvil with spanner surface and pressure spindle.

Application: For splitting inextricably fixed or overly tightened nuts of grades 5; 6; 8 and 10, without damaging the thread. Can also be used in confined areas due to the double cranking action. The hydraulic system minimizes effort.

Note: Dull, jagged or broken chisel must be replaced immediately.

Tools with hydraulic function.
