

KUKKO type 135 fork separator

Design: Solid, fork-shaped wedge head made of special steel, with strong support rod and knurled grip.

Application: For universal cutting and dismantling work. Can be used even in the tightest spaces due to the wedge shape. The parts to be separated, such as the pitman arm, tie rod ends, shock absorbers and chocked ball pin joints in the cone seat, etc., are driven apart by hammer blows on the handle.
