GUHRING Thread milling cutter for female thread, carbide, TiCN, metric type 1891

Design: Ultra-finest grain-solid carbide, with internal supply of coolant (from thread size M4) and 27° right spiral slots to achieve optimum cutting conditions. The milling principle results in an exact thread depth, a very high surface quality in the thread, process-reliable machining of difficult to cut materials and thread production very close down to the base.

Application: For thread cutting and countersinking with a single tool. For regular metric threads (both right and left thread) according to ISO DIN 13 for through-holes and blind holes.

Note: Solid carbide thread milling cutter for additional thread types (UNC, UNF, pipe thread etc.) on request. You will further information in the technical appendix.

Characteristics

Kind of thread: Metric DIN standard: 6535-HA

Kind of thread	Thread size metric (M)	Pitch inner thread	DIN standard	Material	Total length	Thread length	Article
		mm			mm	mm	
Metric	5	0.8	6535-HA	Solid carbide	54	10.8	23413033
