

REMA Spring balancer, heavy-duty version with fixed suspension

Heavy design with solid suspension

- Reduces the workload
- Balancers lock electric and pneumatic tools at the desired working height
- Total weight is carried by the cable
- Construction according to DIN 15112

- **Application**

grinding, riveting hammers, drills, etc.

- **Design**

Fixing the desired cable length in several places by slight movement of the load

- **Areas of application**

for pneumatic and electric tools (drills, screwdrivers, measuring instruments, etc.).

- **Robust material**

flexible stainless steel cable.

Aluminium enclosure.

Specifically designed spiral spring for low-noise operation.

- **Variable and safe attachment**

adjustable load bearing capacity (button) and cable length.

Rotating lower hook.

Additional safety suspension eye.

Wear resistant cable guide.

Isolated suspension.

Fixing at one point possible.
