

LOCTITE 7457 Accelerator, ideal for synthetics sensitive to stress-cracking

Transparent, colorless to slightly amber amine-based instant bonding liquid accelerator for LOCTITE cyanoacrylate adhesives. It can be either pre- or post-applied to the bond.

LOCTITE® SF 7457 is a transparent, colorless to slightly amber, amine-based liquid used to increase the cure speed of LOCTITE cyanoacrylate adhesives. Can be either pre- or post-applied. Used pre-applied, it can be detected by fluorescence. It provides good on-part life and is especially suited post-application. Used for securing wires or coils to PCBs, tamper proofing adjustable components, mounting stand-offs, edge guides and board stiffeners, etc.

Recommended for use on plastics prone to stress cracking

Good on-part life - can be pre- or post-applied

Characteristics

Series: 403

Application	Volume l	Volume ml	Colour	Article
Surface treatment	150	Colourless		23168071
Surface treatment	18	Colourless		23168072
