

IBT Keyway pressure broach 4- 5 mm type 2976

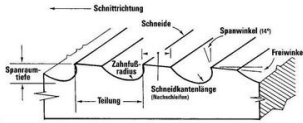

HSS

Design: HSS, with relief angle.

Application: For manufacturing machine elements, templates, welding, drilling and clamping devices, the rake angle has been designed for steel but can also be used for cast iron, bronze and aluminium.

For the fast and rational production of exactly centric keyways true to size in accordance with DIN 6885 for fit JS9. The required chip removal is achieved by several passes. Tooth shape and relief angle guarantee a clean surface finish. Can be used on manual and hydraulic presses.

The shims are included in the scope of supply of the broaches.

Description

Broach HSS type 4II
