

SKF Cylindrical roller bearing full complement Single row Series: NCF

Product description

Full complement bearings (without a cage) incorporate a maximum number of rollers and are therefore suitable for very heavy radial loads at moderate speeds. They are used to locate the shaft axially in one direction and eventually to accommodate axial displacement of the shaft relative to the housing in the opposite direction.

NCF design

These bearings have two integral flanges on the inner ring and one on the outer ring. A retaining ring inserted in the outer ring on the side opposite the integral flange holds the bearing together. The retaining ring should not be loaded axially during operation.

Characteristics

Series: NCF

Manufacturer ID	Cage material	Inner diameter mm	Outer diameter mm	Width mm	Internal clearance	With sealing	Article
NCF 3004 CV	No cage	20	42	16	CN (normal)	No	23767109
NCF 3006 CV	No cage	30	55	19	CN (normal)	No	23767110
NCF 3008 CV	No cage	40	68	21	CN (normal)	No	23767111
NCF 3010 CV	No cage	50	80	23	CN (normal)	No	12121179
