

## **OLEODINAMICA MARCHESINI HI-LO valve VABP**

In a circuit which is supplied by 2 parallel pumps, this valve unloads the larger pump to tank once the setting has been reached. From this point the actuator will only be supplied by the smaller pump at a higher pressure, therefore consuming less energy.

Material: - Body: zinc-plated steel.

- Internal parts: hardened and ground steel.
- Seals: BUNA N.
- Mounting:
- BSP ports.
